

SECURITY STATEMENT

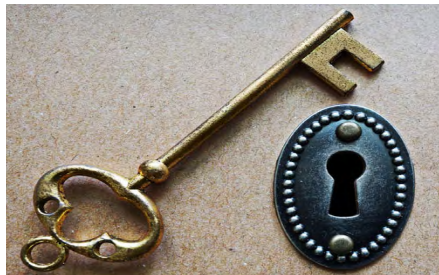

The Location

RUSH Couriers use cloud services wherever possible, this means the data we take from our customers is hosted in a secure data centre in London (UK) which has ISO and BS certifications for information and security management system. The facility has five layer of physical security with 24/7 staffing presence. Other processors of your data use similar cloud-based systems, such as 'Sage-pay'.

Data Security

Application and Database servers are protected by our firewall with IP address /Port restrictions. The connections from application servers to database servers is encrypted and only crosses our network. Our Data Processors will only release

data to our clients Data Officer, in most instances we will also require a senior directors approval accompanying any data request.
